COLD WEATHER, WARM PAWS: WINTER PET CARE TIPS

Help your pets stay comfortable as temperatures drop, especially dogs that spend time outdoors.

Provide warm shelter. Bring pets inside during cold weather. Outdoor shelter should stay dry, block wind and include clean bedding.
Keep water available. Check bowls frequently for ice, and provide fresh water throughout the day.
Protect paws. Wipe feet after walks to remove ice, salt and deicing products. Check between toes for irritation or trapped debris.
Dress for comfort. Shorthaired dogs, smaller breeds and older pets may appreciate a properly fitted coat during outdoor activities.
Stay active. Short walks, indoor games and puzzle toys help dogs exercise when outdoor time is limited.
Watch winter hazards. Keep antifreeze out of reach, supervise pets near heaters and provide a cozy sleeping spot away from drafts.
